

MALCOLM WILSON LAUNCHES PARKSAFE WORKINGTON

Rally driver, Malcolm Wilson, is to launch Workington's Parksafe multistorey car park on 12 February. It is the main car park for the centre of Workington and offers an unparalleled level of security to parkers.

Each bay has a sensor which registers the car's presence and picks up unauthorised access. All cars are watched by a CCTV system which is overseen by a central control room.

The leader of Allerdale Borough Council, Joe Milburn, is also the Executive member with responsibility for parking. He is delighted with what Parksafe has provided so far. "We believe that Parksafe offers not only safe parking for residents and visitors to Workington, but remarkably good value compared with other similar towns. There are only two other towns in the country with Workington's level of security, Derby and Lancaster.
